**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

2. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

-Group I, claims 1-16, drawn to a method for analyzing intensity of light at a pixel corresponding to a point on the target over a plurality of images captured, identifying one of a local maxima/minima of the intensity of light for the pixel to determine which image contains a an optimum focus for the pixel;

-Group II, claims 17-19, drawn to an apparatus comprising an imaging device capable of concurrently capturing multiple images of a same target at discrete focal ranges;

-Group III, claims 20-34, drawn to an apparatus for 3-D imaging;

-Group IV, claims 35-38, drawn to a method for determining a distance to the target based on the first and second intensities;

Group V, claims 39-54, drawing a method for image alignment; and

Group VI, claims 55-60, drawn to a handheld scanner.

3. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: (1) the technical features set forth in Group I invention is not utilized/shared by each of Groups II-VI inventions; (2) the technical features set

Art Unit: 2624

forth in Group II invention is not utilized/shared by each of Groups I-II and IV-VI inventions; (3) the technical features set forth in Group IV invention is not utilized/shared by each of Groups I-III and V-VI inventions; (4) the technical features set forth in Group V invention is not utilized/shared by each of Groups I-VI and VI inventions; and (5) the technical features set forth in Group VI invention is not utilized/shared by each of Groups I-VI inventions. Therefore, a lack of unity exists in this case.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2624

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
